DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see page 8 of the arguments, filed 11/28/2007, with respect to claim 1 have been fully considered and are persuasive. The 35 U.S.C. 102(e) rejection of claim 1 has been withdrawn.
2. Applicant's arguments, see page 9 of the arguments, filed 11/28/2007, with respect to the rejection(s) of claim(s) 10 and 13 under 35 U.S.C. 102(b) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Gellman et al.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 10, 13, 18 and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Gellman et al. 6695834.
5. Gellman et al. teaches a manipulation apparatus which manipulates a calculus in a lumen, comprising a capture tool having a calculus capturing section capable of

crushing and capturing the calculus as an object of manipulation on a dist end portion of an insert section to be inserted into the lumen.

Allowable Subject Matter

6. Claims 1 and 2 are allowable over the prior art of record.

7. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach or render obvious the overall claimed invention of a calculus manipulation apparatus comprising: a first transmission probe having a proximal end portion connected to a first ultrasonic generator element; a second transmission probe capable of being passed through a hollow portion of the first transmission probe, the second transmission probe having a piercer section on the distal end thereof to which ultrasonic vibration is transmitted from a second ultrasonic generator element in combination with other structural limitations claimed.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
